Baka Rokarire~ia tir+~dito
protects

702.359 Ha
of Amazon Rain Forest
in Colombia

With an estimated
Annual Emission
Reduction of

524.146
tons CO₂e

Creating social
impacting into

425
indigenous families

CERCARBONO

Certified Carbon Standard

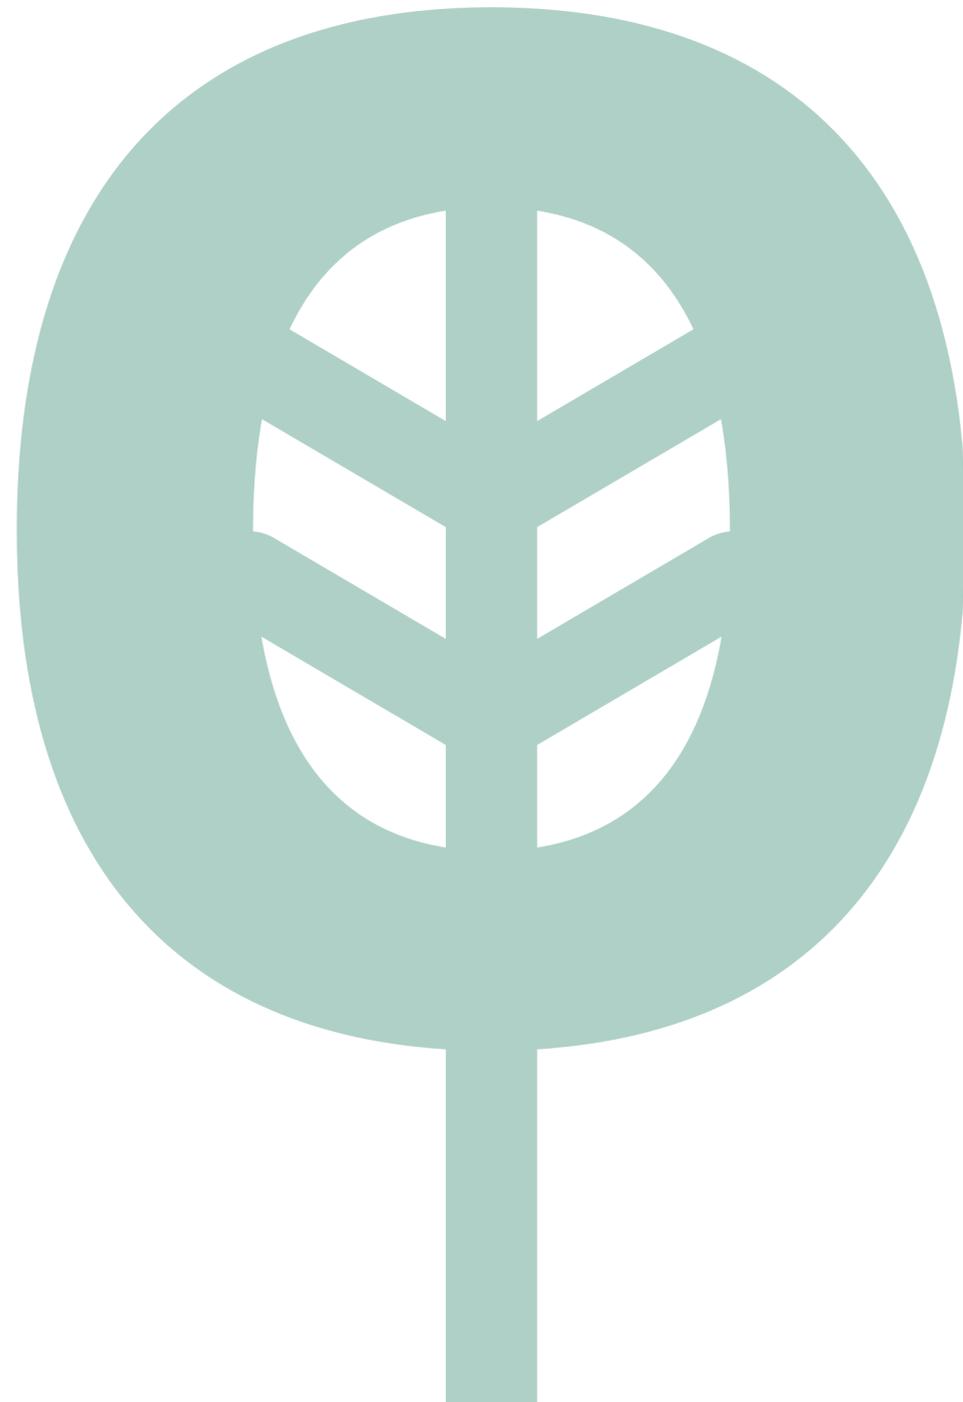

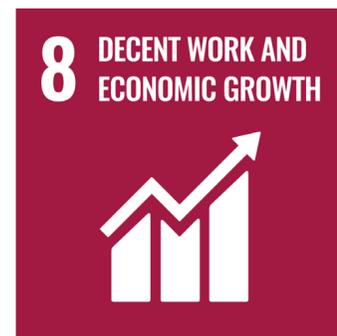

Cercarbono is a private voluntary carbon certification standard or programme, which facilitates and guarantees the registration of Climate Change Mitigation Programmes or Projects (CCMPs), the certification of emissions and the registration of carbon credits generated by these programmes or projects.

Ruby Canyon Environmental is an ANAB and EMA accredited third-party GHG validation and verification body under the ISO 14065. In six occasions Ruby Canyon was named the Best Verification Company in North America in the Environmental Finance market survey.

Baka Rokarire~ia tir+~dito project was developed with Cercarbonos REDD+ Methodology that has included UNFCCC reference levels and verified by Ruby Canyon Environmental as a third party VVB.

Baka Rokarire~ia tir+~dito contributes with the following SDGs

Baka Rokarire-ia tir+~dito project will invest the incoming resources to improve the indigenous community well fair.

The project will promote the sustainable use of the forest avoiding deforestation and promoting Restoration in the deforested and degraded areas.

All these activities will follow the ancestral indigenous traditions with the permanent and active participation of the community, especially involving indigenous women. Also, the project includes a renewable source of free clean energy, access to clean water, and reinforcing the indigenous traditions.
